

ERP Readiness Checklist

Is Your Current ERP System Ready For What's Next?

Compliance & Reporting

- System supports automatic updates for state and federal reporting changes
- Produces GASB 34, GAAP, and GAAFR-compliant reports
- Finance and budgeting data flow seamlessly into reports without manual exports
- Provides full audit trails and transparency reports on demand

Budgeting & Forecasting

- Budgeting connects directly with payroll and financial data
- Supports multi-year budgets and funding scenarios
- Department heads securely input and track requests
- Automatic updates across departments for approved changes

Integration & Connectivity

- ERP integrates all core modules including payroll, HR, billing, utilities, and accounting
- Data updates in real time across departments
- No more separate systems or spreadsheets
- Online payment portal syncs directly with financial data

Citizen Transparency & Engagement

- Online portal allows citizens to view and pay bills anytime
- Budget and spending data easily accessible to citizens
- FOIA requests reduced through online transparency
- Ability to send updates and notifications directly

Security & Cloud Readiness

- System hosted in a secure, compliant cloud environment
- Reliable disaster recovery and backups in place
- Safe, remote access for staff
- Automatic updates with minimal IT maintenance

Support & Vendor Partnership

- Quick, knowledgeable support team familiar with local government
- Ongoing updates and training available
- Online ticket tracking and reporting system
- Transparent roadmap for continued product innovation
